Parks

Background

The City of Lacey 2017 Parks & Recreation Comprehensive Plan serves as the primary framework for providing high-quality parks and recreation facilities to residents and visitors of Lacey and its surrounding urban growth area, and will ensure that adequate facilities and resources are available in the future.

In developing the Parks & Recreation
Comprehensive Plan, Lacey and its Urban
Growth Area (UGA) was divided into ten "park
planning sectors," each encompassing a different
geographic area. The UGA was adopted by local
jurisdictions in 1988. An inventory of all public
and private park and recreational facilities, as well
as special features, conditions, and limitations
which could affect future park land acquisition
and development, was conducted in each sector.

To ensure that the parks and recreation planning process would address the interests and needs of the citizenry, a significant public participation program was implemented for development of the 2017 Parks & Recreation Comprehensive Plan. The process began in 2015, continued through 2017, and included a number of outreach strategies. Citizens were invited to take a survey

(online or in-person) and the City collected 219 surveys. In addition, City staff held public meetings to collect input. In early 2017, the public was invited to provide feedback regarding the Parks and Recreation Department's goals and priorities. Parks and Recreation staff and Park Board members attended six community events and three public meetings were also held, to gather public comment. In addition, the City posted a survey on the website, social media and a utility bill insert, encouraging input. The City received a total 870 survey responses, 702 submitted electronically and 168 submitted on paper at various community events. Nearly 60 percent of survey respondents were City of Lacey residents.

Results of the survey indicated strong support for improvement of existing parks and facilities with the most weight in field development (with preference given to the Regional Athletic Complex), indoor sports arena, expanding disc golf, spray park, outdoor pool, and access to water for recreation purposes. Survey results also indicated need for a high quality, diversified park system, and provided a large amount of complimentary feedback.

The information acquired through the facilities inventory, the survey, and public participation during development of the 2017 Parks and Recreation Comprehensive Plan, together with City and UGA population growth forecasts, provided the basis for the plan's development.

Parks and Recreation 2017 Strategic Goals

- Develop a high quality, diversified parks and recreation system that includes unique facilities, events, and recreation programs that encourage social interaction, cultivate community spirit, and strengthen the livability of Lacey.
- Prioritize Parks and Recreation projects and identify corresponding current and future funding sources.
- 3) Develop a trails system that interconnects parks, schools, neighborhoods, open spaces, other trail systems, and important public facilities.
- 4) Provide parks, facilities, and programs to underserved areas and/or natural areas that should be preserved.
- 5) Preserve and enhance sites and artifacts of historical and cultural importance and make the accessible to the community.
- 6) Leverage investments in parks, recreation, and facilities and maintain Lacey's eligibility for grant funding.
- 7) Develop a sustainable park system that meets community needs.

Policies vital to achieving goals include:

- Pursue traditional and non-traditional programs and amenities for all ages and families
- Hire, train, support, and develop a high standard of professional parks and recreation staff
- Protect our assets by maintaining parks and recreation facilities at a high standard of care

- Create sound planning structure and accountability for all recreation business areas
- Due to shortage of athletic fields for community use, acquire and provide additional athletic field sites to ensure sufficient land is available for community use and regional draw
- Continue events that have community and regional draw
- Provide rental spaces for special private and community events and places for the community to gather
- Move from acquisition phase to development phase
- Investigate sustainable and revenueproducing options
- Identify funding sources for property and facility development and secure stable, long] term revenue sources
- Continue to provide a trail system that promotes physical activity and a healthconscious community
- Incorporate critical areas, ecological features, and natural resources into the park system to protect and preserve habitat and retain migrations corridors important to local wildlife
- Connect natural areas and open space in the developed areas. Preserve these open areas to meet the future needs of increasing population
- Maintain significant, high-quality historical resources that recognize our diverse community
- Educate the public about Lacey's history, including significant historical and cultural artifacts and sites
- Initiate and strengthen partnerships to offer optimum services to residents that would not be possible without the partnership
- Provide parks in close proximity to all residents

- Ensure Lacey's park system includes opportunities for its citizens to experience nature and solitude
- Ensure a strategic planning process is in place to reflect site suitability and development

Prioritized Actions in the Parks Comprehensive Plan

Field Development – Pursue adding fields at the RAC, Nisqually/Bucknell property and/or Meridian Park

Museum – Construct historic Lacey train depot replica as a Karen Fraser Woodland Trail amenity, and update site plan to provide the foundation for new Lacey Museum & Civic Center in the Depot District

Indoor Sports Arena – Explore feasibility of large, indoor, multi-sport complex

Master Planning – Explore development of concept plan for Cuoio Park, pursue improvements to Pleasant Glade Park, explore creating concept plan for Meridian Campus North Neighborhood Park

Swimming & Water Access – Explore feasibility of developing Wanscher's Park

Spray Park or Outdoor Pool – Explore feasibility study

Indoor Pool & Community Center - Revisit feasibility study Aquatic Center / Community Center

Facility Upgrades – Further develop (or upgrade) the historic Jacob Smith House by improving parking, adding a gazebo, and maintaining the historic nature of the house

Programming – Identify recreation program and activity deficiencies in the Lacey community and create strategies to fill these gaps. Create a formalized program to encourage and provide opportunities for volunteer stewardship of parks and natural areas.

Trails – Coordinate with adjacent jurisdictions and State agencies to build a regional trail network and coordinated trail signage program, consistent with the Thurston Regional Trail Plan.

Facility Definitions

General guidelines have been established to provide an inventory of community parks and open space to assess the capacity and levels of service for proposed development improvements and facility needs.

Plazas and Public Spaces

Plazas and public spaces are small, specialized facilities including tot lots, downtown parks, and seating areas along trails or sidewalks. Plazas and public spaces:

- Are typically used by nearby residents or special user groups, such as downtown employees and shoppers.
- Have a service radius of two to three blocks with no minimum acreage guidelines, but are typically less than one acre.
- Usually have benches or picnic tables, flags or artwork, and limited play equipment, if any.
- Are usually located in proximity to higherdensity residential or commercial areas with pedestrian access.
- Tot lots, often referred to as pocket parks, which are typically dedicated as active open space within subdivisions, are owned and maintained by the development's Homeowners Association. They are not available for public use and not included in this inventory.

Neighborhood Parks

Neighborhood parks are easily accessible and serve the nearby population within walking distance of all residential areas. Neighborhood parks:

• Should be located within one-half mile of each resident and preferably, 5 to 20 acres.

- Are typically designated for the primary purpose of active, outdoor recreation.
- Include open, multi-purpose playfields, limited athletic facilities, sport courts, children's playgrounds, and picnic facilities. Restroom facilities, if provided, are portable and/or seasonal. Parking is usually limited to parallel parking in the roadway.
- Sites suitable for neighborhood parks are lands that can support intense development. At least 50 percent of a neighborhood park should be bordered by public roads, located in the center of the service area with convenient pedestrian access, and adjacent to or in close proximity to other open space and school sites.
- Trails and open space, accessible to nearby neighborhoods, are considered neighborhood parks.

Community Parks

Community parks serve multiple neighborhoods and may serve the entire city and urban growth area by offering a diverse environment suitable for a wide range of active and passive recreational activities. Community parks often include features unique in the community or the city, and:

- Provide developed and natural areas.
- Have a preferred size of 40-100 acres and are desired in each of the ten planning areas
- Have common features such as athletic fields and courts (lighted or day-use), swimming facilities, recreation buildings, group picnic facilities, natural areas, skate park, and local access trail systems.
- Sites suitable for community parks include shorelines, waterfront, natural features and vegetation, and varied topography. At least 50 percent of the land should be bordered by public streets accessed from an arterial street, and a portion of the site normally must be suitable for intense development.

Regional Parks

Regional parks are areas offering recreational opportunities that attract a diverse group of people countywide or from a larger region. They provide regional residents an opportunity to enjoy outdoor recreation in a natural setting or in an intensely developed area. Regional parks:

- Might include common features such as special-purpose facilities, lighted athletic complex, waterfront, or natural areas.
- Typically require a user-fee and should not be entirely supported by City of Lacey tax dollars.

Special-Purpose Facilities

Special-purpose facilities offer major specialized or single-purpose facilities filling particular needs for specific recreational facilities. Special-purpose facilities:

- Service area can be variable and is generally communitywide. The acreage, preferred size, and site factors are variable as well.
- Common features include indoor swimming areas, golf courses, nature centers, athletic facilities, museums, and community centers.

Linear Parks

Linear parks are areas developed for recreational travel or to accent linear resources, such as a stream or shoreline. Linear parks:

- Provide the community with an opportunity to enjoy shorelines and streams and places to walk, jog, bicycle, or ride horseback along paths set apart from public streets.
- Service areas can be variable, generally communitywide or regional, and the acreage and size can also be variable.
- Common features include paved paths, seating areas, landscaping, shoreline, and viewpoints.
- Suitable sites for linear parks include linkages between public facilities, neighboring land uses, and varied topography. They have easy public access and typically, multiple access points.

Open Space

Open Space is an undeveloped area which may or may not get developed. Open space:

- Development of open space may be approved for passive recreation uses or conservation efforts. These areas typically have protection measures associated with designated natural areas.
- They may provide a buffer between land uses, ensure a rural atmosphere, reduce building density, preserve natural settings, provide visual relief, or are used for other public purposes.
- The size is variable.
- Common features of open areas are natural vegetation or landscaping and steep topography. The open space may provide wildlife habitat.
- Sites suitable for open spaces depend on the density of surrounding development.

Conservancy Sites

Conservancy sites are special management areas with rare, irreplaceable, natural, or cultural features. Conservancy Sites:

- Are created to preserve, protect, and enhance appreciation of significant or sensitive environmental and cultural features.
- Are variable in size.
- Common features include wetlands, wildlife habitat, and historical sites and structures.
- Suitable sites show a presence of significant and sensitive features.
- May be commonly called natural areas, refuges, or habitat reserves.

Levels of Service Standards

The purpose of a Level of Service standard ensures:

- The City provides adequate park and recreation facilities as it develops and grows.
- Land is acquired where there is an identified need.

 Equitable distribution and accessibility to park and recreational facilities available to residents throughout the City and its Urban Growth Area.

Currently, the RCO and the state do not have required level of service standards. Each community can decide how to determine their level of service based on different criteria such as quantity, distribution and access, or quality. Many communities use their level of service to assess how they compare to neighboring cities or cities of similar size and geographic area. Acreage alone does not give a realistic picture of how well park and recreational needs are being met in a community. Convenient and accessible park and recreational facilities are also a consideration. A community could have the majority of its acreage in several large parks, and find that, despite meeting a level of service, it does not serve the residents as well as the community with several smaller parks located within easy walking distance of homes.

National Level of Service

For many years, the National Recreation and Park Association (NRPA) recommended a standard of 10 acres per 1000 population for local parks. Typically, counties, park districts, and state agencies provide regional facilities. Lacey is well within this national standard. The City has 1,200 acres of park land for a population of 81,750 people in the Lacey Urban Growth Area. The national standard, based on our population, is 817.5 acres. Lacey also has many acres of greenspace, wetlands, and wildlife habitat areas in addition to the 1,200 acres of park property identified above.

NRPA also has recommendations for number of recreation facilities and amenities per population; however, each community is unique and therefore it is important to include this type of information in the Local level of service section.

Local Level of Service

Many local agencies adopt their own level of service standard because each community is different, and each place a different emphasis on the amount of park and recreational facilities desired in the community and to what extent it is developed.

Lacey adopted a standard of having a neighborhood park/trail within one-half mile of each resident. This is consistent with the Washington State Recreation and Conservation Office. Lacey would also like to have a community park and/or regional park in each of the ten planning areas.

The quality of park amenities, intensity of development, number of people in the park, and the experience a person has at the park (based on natural features and beauty, safety, cleanliness, and welcoming environment) are difficult to assess in a level of service. Although difficult to assess, these criteria play an important role in determining if we are meeting our residents' needs. Comments from park visitors indicate we have high-quality, heavily used parks.

City programs and activities offered at parks and facilities also contribute to its level of service, yet are difficult to measure. In 2019, the Plan will be updated with program level of service.

Often, community parks and open spaces (including trails) fill the role of neighborhood parks. In fact, this occurs in most of the ten planning areas. Wonderwood Park is an example of an existing park that serves neighborhood and community park needs. In this situation, there would be no need to provide a neighborhood park within a .5-mile distance from Wonderwood Park.

The City of Lacey's partnerships with Thurston County, North Thurston Public Schools, and Senior Services of South Sound are a crucial part of providing an adequate level of service. The city contracts with Thurston County to provide Specialized Recreation programs for individuals with disabilities. The city also partners with Senior Services of South Sound to provide senior programs and activities.

Recreation Facilities/Amenities

The Regional Athletic Complex, Lacey's premier sports venue, was made possible by an agreement with Thurston County.

The city has a joint-use agreement with North Thurston Public Schools that allows each entity first-priority use. It also gives the City the opportunity to schedule all the athletic fields (school use comes first), and use the three high school pools for swim lessons and aqua fitness. The City also schedules other swim team use (other than City or North Thurston Public Schools).

The athletic field shortage, due to increased demand and lack of resources to maintain and irrigate fields appropriately, creates a challenge in partnering with North Thurston Public Schools. For example, the Bucknell/Nisqually fields closure eliminated 5 sports fields for community groups to use. In addition, 10 other fields were recently removed from community-use inventory due to long-needed maintenance and/or school use.

Due to a combination of public input for more field needs, higher-than-ever requests from community sports groups, and a lack of resources from the school district, the need for more sports fields has increased significantly. Lacey's mostimmediate local amenity needs include:

- 4, full size multi-use sports fields (soccer/lacrosse/football/etc.)
- 4, full size baseball/softball fields

Other needs will be identified in the next Plan update.

Open Space

In addition to park-designated land, the City has many other areas dedicated to open space. These areas differ from open spaces designated as part of the park system, however, are a valuable resource for preservation of sensitive areas such as wetlands and fish and wildlife habitat conservations. A map of these areas is being developed to identify this type of open space. These areas contribute to the overall level of service.

In addition, the City of Lacey requires developers to provide 10 percent open space, dedicated to park use with an active component, for all new developments. These areas include tot lots, pocket parks, and trails, which also contribute to Lacey's overall level of service

Land

• Acquisition of park land, average cost is \$150,000 per acre.

Maintenance

- Maintenance personnel: One technician per 12-15 acres of developed park area
- Total annual maintenance and operation costs including administration, support staff, and miscellaneous items: \$12,000 to \$14,000* per developed acre.
- *Estimated costs are in 2017 dollars and may not include all project costs

Parks, Trails, and Facilities

Amenity Type	Development/Construction Cost	Notes
Neighborhood Park	\$120,000*/acre	Excluding natural areas
Community Park	\$120,000-\$240,000*/acre	Excluding natural areas
Urban Trail	\$1M*/mile	Paved, regional, multi-modal 10-12 ft path for pedestrians & cyclists
Urban Trail	\$650,000*/mile	Smaller pathway, depending on width & complexity
Trail	\$50,000*/mile	Regional 4-ft gravel path with geotextile fabric
Facility	\$480/sq ft of building (likely includes FF&E) \$120,000-\$180,000*/acre for parking and outdoor elements	
*Estimated costs in 2017 do	llars and may not include all project costs	S

Capital Project Scheduling

Some of the projects listed in this Capital Facilities Plan may appear in an order that differs from that shown in the 2017 Parks and Recreation Comprehensive Plan. In the comprehensive planning process, it is not always possible to determine exact timeline.

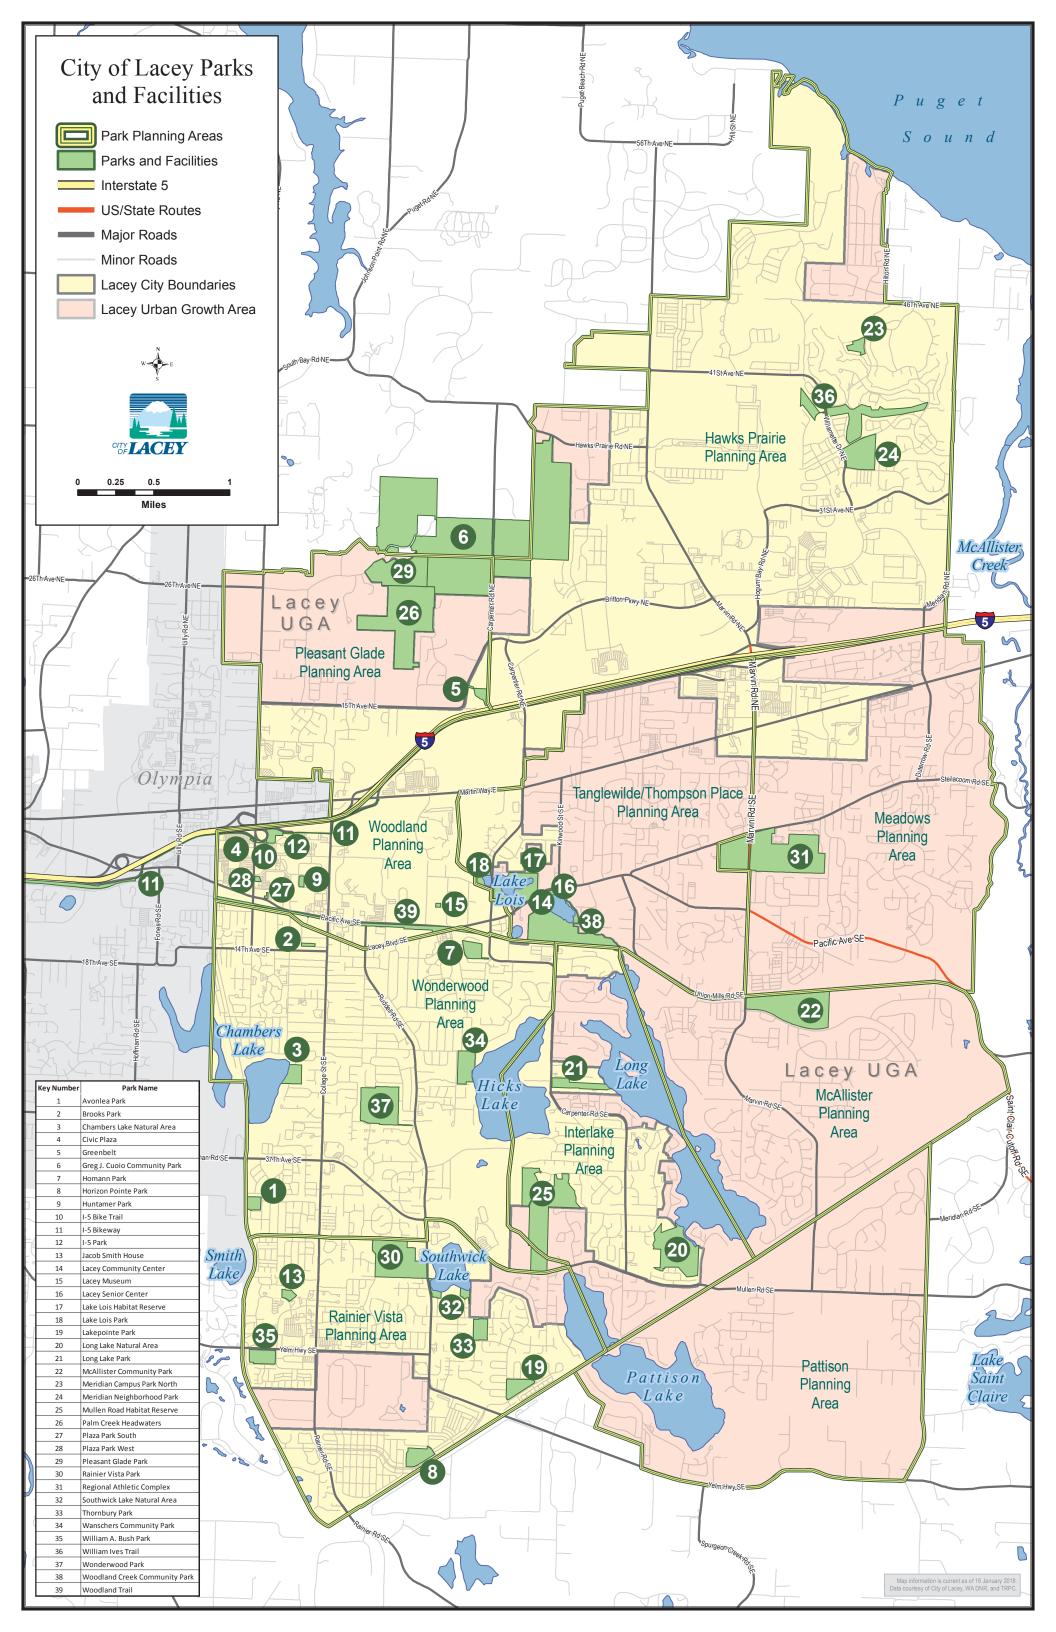

6-Year Capital Project Financing

The first public facility was donated to the City of Lacey in 1970, and the first park was acquired in 1971. In 1990, the City began collecting a 1% utility tax for the acquisition and development of parks and open spaces. In 2002, Lacey voters supported a \$9.9 million bond issue to fund park development and renovation. By 2009, all bonds had been spent.

The six-year Capital Improvement Plan has no established funding sources identified for new park development. Therefore, continuing consideration must be given to establishing a Metropolitan Park District and/or park bond measure for future funding. Currently, project implementation relies heavily on outside revenue sources.

Acquisition of park land is financed primarily with utility taxes, grants, donations, and land dedicated as a results of development mitigation. Parks and facilities have been developed with voted G.O. bonds, grants, development mitigation, SEPA, utility taxes, the public facilities district sales tax revenues, general revenue, lodging tax revenues, and donations.

Pleasant Glade Park / Dev 5011 Pleasant Glade Rd NE File Number: UGA Planning Area: Parks Plan Sector: pr001.xls Pleasant Glade Pleasant Glade CFP Project: Department:

PARKS- 1 Parks

Project Description:

Phase 1 development of a neighborhood park site. The parkland, 32 acres, was acquired in 2002 with State Grant funds. Minimal development (trail, fencing, picnic table, kiosk, parking) to accommodate public use of the site.

Project Justification:

Policy Basis: 2004, 2010, and 2017 Parks & Recreation Comprehensive Plan

Current Project Status: Planning

Land Status: City Owned
