

Table of Contents

Chapter 1 – Introduction	1-1
1.1 Background and Authority	1-1
1.2 Objective	1-2
1.3 Organization of this Manual	1-3
1.3.1 Overview of Manual Content	1-3
1.3.2 Organization of this Manual	1-4
1.4 Site Planning and Layout	1-4
1.5 Development of BMPs for Stormwater Management	1-6
1.5.1 Best Management Practices	1-6
1.5.2 Construction Stormwater BMPs (Chapter 5).....	1-6
1.5.3 Flow Control BMPs (Chapter 7).....	1-6
1.5.4 Low Impact Development BMPs (Chapter 7)	1-7
1.5.5 Runoff Treatment BMPs (Chapter 8)	1-7
1.5.6 Source Control BMPs (Chapter 9).....	1-7
1.6 Maintenance of Stormwater Best Management Practices	1-7
1.7 Relationship of this Manual to Federal, State, and Local Regulatory Requirements	1-8
1.7.1 The Manual’s Role as Technical Guidance and Requirements	1-8
1.7.2 More Stringent Measures.....	1-9
1.7.3 Retrofitting.....	1-10
1.7.4 Presumptive Versus Demonstrative Approaches to Protecting Water Quality	1-10
1.7.5 Phase II – NPDES and State Waste Discharge Stormwater Permits for Municipalities	1-11
1.7.6 Industrial Stormwater General Permit	1-11
1.7.7 Construction Stormwater General Permit.....	1-11
1.7.8 Endangered Species Act	1-12
1.7.9 Section 401 Water Quality Certifications (included in JARPA).....	1-13
1.7.10 Hydraulic Project Approvals (included in JARPA).....	1-13
1.7.11 Aquatic Lands Use Authorizations (included in JARPA).....	1-13
1.7.12 Requirements Identified through Watershed or Basin Planning	1-14
1.7.13 Underground Injection Control – UIC Authorizations	1-14
Chapter 1 References and Information Sources.....	1-15
Glossary and Abbreviations	Glossary-1
Glossary	Glossary-1
Abbreviations.....	Glossary-38

Chapter 2 – Requirements for New Development and Redevelopment

Table of Contents

Chapter 2 – Requirements for New Development and Redevelopment.....		2-1
2.1	Introduction	2-1
2.1.1	Purpose, Content, and Organization	2-1
2.1.2	Applicability of the Core Requirements	2-2
2.1.3	Exemptions	2-8
2.2	Core Requirements	2-9
2.2.1	Core Requirement #1: Preparation of Stormwater Site Plans	2-9
2.2.2	Core Requirement #2: Construction Stormwater Pollution Prevention	2-10
2.2.3	Core Requirement #3: Source Control of Pollution	2-11
2.2.4	Core Requirement #4: Preservation of Natural Drainage Systems and Outfalls	2-12
2.2.5	Core Requirement #5: On-Site Stormwater Management.....	2-13
2.2.6	Core Requirement #6: Runoff Treatment	2-19
2.2.7	Core Requirement #7: Flow Control	2-21
2.2.8	Core Requirement #8: Wetlands Protection	2-26
2.2.9	Core Requirement #9: Operation and Maintenance	2-27
2.3	Additional Requirements.....	2-28
2.3.1	Financial Guarantees	2-28
2.3.2	Other Additional Requirements	2-28
2.4	Adjustments.....	2-29
2.5	Exceptions and Variances	2-29

Figures

Figure 2.1.	Flow Chart for Determining Requirements for New Development.....	2-6
Figure 2.2.	Flow Chart for Determining Requirements for Redevelopment.....	2-7
Figure 2.3.	Flow Chart for Determining Core Requirement #5 Requirements.....	2-18

Chapter 3 – Stormwater Submittals

Table of Contents

Chapter 3 – Stormwater Submittals	3-1
3.1 Purpose, Content, and Organization	3-1
3.2 Drainage Review Types and Submittals	3-1
3.2.1 City Projects.....	3-2
3.2.2 Project Submittal Process	3-2
3.2.3 Design Plan Certification.....	3-3
3.3 Drainage Submittals for Permit Application	3-5
3.3.1 SWPPP Short Form	3-5
3.3.2 Abbreviated Plan	3-6
3.3.3 Drainage Control Plan	3-15
3.4 Plans Required After Stormwater Site Plan Approval	3-36
3.4.1 Stormwater Site Plan Changes.....	3-36
3.4.2 Final Corrected Plan Submittal.....	3-36
Appendix 3A – Construction Stormwater Pollution Prevention Plan (SWPPP)	
“Short Form”	3A-1
Appendix 3B – Stormwater Facility Maintenance Guide.....	3B-1
Maintenance Standards	3B-1
Maintaining Stormwater Facilities	3B-3
Maintenance Checklists	3B-3
Checklist Instructions	3B-4
Resource Listing	3B-5
Log Sheet	3B-6
Stormwater Facility Inspection and Maintenance Procedure	3B-7
Step 1. Identify	3B-7
Step 2. Inspect	3B-8
Step 3. Maintain	3B-8
Step 4. Submit	3B-8
Common Stormwater Facilities: Identification and Actions	3B-9
Group 1 – Flow Control and Treatment Facilities.....	3B-19
1a. Detention Ponds	3B-19
1b. Infiltration Ponds, Trenches, and Galleries.....	3B-23
1c. Detention Tanks and Vaults	3B-28
1d. Wet Vaults.....	3B-30
1e. Wet Ponds	3B-31

1f. Stormwater Wetlands.....	3B-33
1g. Basic and Compost-Amended Biofiltration Swale	3B-37
1h. Wet and Continuous Inflow Biofiltration Swales	3B-39
1i. Filter Strip (Basic and CAVFS).....	3B-41
1j. Sand Filter (aboveground/open)	3B-42
1k. Sand Filter (belowground/closed).....	3B-44
1l. Media Filter Drains	3B-46
1m. Bioretention Cells, Swales, and Planter Boxes	3B-48
1n. Rain Gardens	3B-54
1o. Trees	3B-57
1p. Permeable Pavement	3B-58
1q. Vegetated Roofs	3B-61
1r. Downspout, Sheet Flow, Concentrated Flow Dispersion.....	3B-66
1s. Downspout Infiltration	3B-69
1t. Cisterns	3B-71
1u. Fencing/Shrubbery Screen/Other Landscaping.....	3B-72
1v. Manufactured Media Filters.....	3B-73
1w. Proprietary or Manufactured Products	3B-75
Group 2 – Structures and Pretreatment.....	3B-76
2a. Control Structures and Flow Restrictors	3B-76
2b. Catch Basins.....	3B-78
2c. Debris Barriers (trash racks).....	3B-81
2d. Energy Dissipators	3B-82
2e. Baffle Oil/Water Separators (API type)	3B-85
2f. Coalescing Plate Oil/Water Separators.....	3B-86
2g. Catch Basin Inserts.....	3B-88
Group 3 – Miscellaneous Facilities and Features	3B-89
3a. Conveyance Pipes, Culverts, Ditches, and Swales.....	3B-89
3b. Access Roads and Easements.....	3B-91
Appendix 3C – O&M Cost Estimate Calculations	3C-1
Introduction.....	3C-1
Part I: Inventory of On-Site Stormwater Facilities	3C-1
Part II: Routine Operation and Maintenance Assumptions.....	3C-1
Part III: Routine Operation and Maintenance Estimated Annual Cost	3C-2
Part IV: Estimated Annual Partial Replacement Cost	3C-2
Part V: Estimated Monthly Contribution to Stormwater Facilities Operation and Maintenance Account	3C-2

Figure 3.1.	Typical Abbreviated Plan Components.....	3-6
Figure 3.2.	Typical Drainage Control Plan Components.....	3-15

Chapter 4 – Stormwater BMP Selection

Table of Contents

Chapter 4 – Stormwater BMP Selection	4-1
4.1 Purpose	4-1
4.2 BMP and Facility Selection Process	4-1
Step 1: Determine and Read the Applicable Core Requirements	4-1
Step 2: Select Source Control BMPs	4-1
Step 3: Determine Threshold Discharge Areas and Applicable Requirements for Treatment, Flow Control, and Wetlands Protection	4-2
Step 4: Select Flow Control BMPs and Facilities.....	4-4
Step 5: Select Treatment Facilities	4-5
Step 6: Review Selection of BMPs and Facilities	4-6
Step 7: Complete Development of Permanent Stormwater Control Plans and Submittals	4-6

Figures

Figure 4.1. Threshold Discharge Areas..... 4-3

Chapter 5 – Construction Stormwater Pollution Prevention

Table of Contents

Chapter 5 – Construction Stormwater Pollution Prevention.....	5-1
5.1 Introduction to Construction Stormwater Pollution Prevention.....	5-1
5.1.1 Purpose of This Chapter	5-1
5.1.2 Content and Organization of This Chapter	5-1
5.1.3 Thirteen Elements of Construction Stormwater Pollution Prevention	5-2
5.1.4 Water Quality Standards.....	5-3
5.1.5 Other Applicable Regulations and Permits.....	5-5
5.2 Planning.....	5-5
5.2.1 General Guidelines	5-6
5.2.2 Construction SWPPP Requirements.....	5-8
5.2.3 Step-by-Step Procedure	5-13
5.3 Protection of LID Facilities During Construction.....	5-32
5.3.1 Introduction.....	5-32
5.3.2 General Erosion and Sediment Control BMPs Applicable to LID.....	5-33
5.3.3 Additional Construction Techniques for LID BMPs.....	5-33
5.3.4 BMP-specific Construction Techniques	5-36
5.4 Construction SWPPP Best Management Practices Standards and Specifications	5-39
BMP C101: Preserving Natural Vegetation.....	5-44
BMP C102: Buffer Zones	5-47
BMP C103: High Visibility Fence.....	5-48
BMP C105: Stabilized Construction Entrance/Exit.....	5-49
BMP C106: Wheel Wash.....	5-52
BMP C107: Construction Road/Parking Area Stabilization.....	5-55
BMP C120: Temporary and Permanent Seeding.....	5-57
BMP C121: Mulching.....	5-64
BMP C122: Nets and Blankets	5-67
BMP C123: Plastic Covering.....	5-72
BMP C124: Sodding	5-74
BMP C125: Topsoiling/Composting	5-75
BMP C126: Polyacrylamide (PAM) for Soil Erosion Protection	5-79
BMP C130: Surface Roughening.....	5-80
BMP C131: Gradient Terraces.....	5-83
BMP C140: Dust Control.....	5-85
BMP C150: Materials on Hand.....	5-87
BMP C151: Concrete Handling	5-89
BMP C152: Sawcutting and Surfacing Pollution Prevention	5-91

BMP C153: Material Delivery, Storage, and Containment 5-93

BMP C154: Concrete Washout Area 5-95

BMP C160: Certified Erosion and Sediment Control Lead..... 5-101

BMP C162: Scheduling 5-103

BMP C200: Interceptor Dike and Swale..... 5-104

BMP C201: Grass-Lined Channels 5-107

BMP C202: Channel Lining 5-112

BMP C203: Water Bars 5-114

BMP C204: Pipe Slope Drains..... 5-116

BMP C205: Subsurface Drains 5-119

BMP C206: Level Spreader 5-122

BMP C207: Check Dams 5-125

BMP C208: Triangular Silt Dike (TSD) (Geotextile-Encased Check Dam) 5-128

BMP C209: Outlet Protection 5-130

BMP C220: Storm Drain Inlet Protection..... 5-132

BMP C231: Brush Barrier..... 5-139

BMP C233: Silt Fence 5-141

BMP C234: Vegetated Strip 5-147

BMP C235: Wattles 5-148

BMP C236: Vegetative Filtration 5-151

BMP C240: Sediment Trap..... 5-154

BMP C241: Temporary Sediment Pond 5-157

BMP C250: Construction Stormwater Chemical Treatment 5-164

BMP C251: Construction Stormwater Filtration 5-165

BMP C252: High pH Neutralization Using CO₂ 5-166

BMP C253: pH Control for High pH Water 5-167

Chapter 6 – Hydrologic Analysis Methods and Conveyance Design

Table of Contents

Chapter 6 – Hydrologic Analysis Methods and Conveyance Design.....	6-1
6.1 Purpose, Content, and Organization.....	6-1
6.2 Minimum Computational Standards	6-1
6.2.1 Discussion of Hydrologic Analysis Methods Used for Runoff Modeling and BMP Design	6-2
6.2.2 Guidance for Flow Control Standards	6-4
6.3 Conveyance Design and Analysis	6-5
6.3.1 Design Storm Frequency	6-6
6.3.2 Backwater Analysis	6-7
6.3.3 Conveyance System Route Design	6-7
6.3.4 Easements, Access, and Dedicated Tracts	6-8
6.3.5 Design Methods and Criteria	6-9
6.3.6 Private Drainage Systems	6-33
Appendix 6A – Design Aids: Design Storm Precipitation Values, Isopluvial Maps, SCS Curve Numbers, Roughness Coefficients, and Soil Types.....	6A-1
6A.1 Single Event Model Guidance.....	6A-1
6A.1.1 SBUH or SCS Methods	6A-1
Appendix 6B – Nomographs for Various Culvert Sizing Needs	6B-1

Chapter 7 – Flow Control Design

Table of Contents

Chapter 7 – Flow Control Design.....	7-1
7.1 Purpose, Content, and Organization.....	7-1
7.2 Infiltration Facilities.....	7-3
7.2.1 Purpose.....	7-3
7.2.2 Procedures.....	7-4
7.2.3 General Criteria for Infiltration Basins, Trenches, and Galleries.....	7-11
7.3 Underground Injection Control.....	7-14
7.4 Flow Control Design.....	7-15
7.4.1 Postconstruction Soil Quality and Depth (Ecology BMP T5.13).....	7-15
7.4.2 Dispersion Facilities.....	7-22
7.4.3 Tree Planting and Tree Retention (Ecology BMP T5.16).....	7-35
7.4.4 Bioretention Cells, Swales, and Planter Boxes (Ecology BMPs T5.14B and T7.30).....	7-42
7.4.5 Rain Gardens (Ecology BMP T5.14A).....	7-69
7.4.6 Permeable Paving (Ecology BMP T5.15).....	7-73
7.4.7 Infiltration Trenches (Ecology BMP T7.20).....	7-91
7.4.8 Infiltration Galleries.....	7-97
7.4.9 Infiltration Basins (Ecology BMP T7.10).....	7-101
7.4.10 Roof Downspout Controls.....	7-104
7.4.11 Vegetated Roofs (Ecology BMP T5.17).....	7-118
7.4.12 Roof Rainwater Collection Systems (Ecology BMP T5.20).....	7-123
7.5 Detention Facilities.....	7-126
7.5.1 Detention Ponds.....	7-127
7.5.2 Detention Tanks.....	7-145
7.5.3 Detention Vaults.....	7-149
7.5.4 Control Structure Design.....	7-152
7.5.5 Other Detention Options.....	7-164
7.6 LID Site Design BMPs.....	7-165
7.6.1 Preserving Native Vegetation (Ecology BMP T5.40) and Restoring Site Vegetation.....	7-165
7.6.2 Reduce Effective Impervious Areas.....	7-171
7.6.3 Better Site Design (Ecology BMP T5.41).....	7-177
Chapter 7 References and Information Sources.....	7-181

Appendix 7A – Methods for Determining Design Infiltration Rates..... 7A-1

- 7A.1 Determining Design Infiltration Rates 7A-1
- 7A.2 Method 1 – Field Testing Procedures..... 7A-2
 - 7A.2.1 Safety Factor for Field Measurements..... 7A-2
 - 7A.2.2 Alternative Washington Department of Ecology PIT Methods 7A-5
- 7A.3 Method 2 – Soil Grain Size Analysis Method..... 7A-8
- 7A.4 Recommended Modifications to ASTM D2434 When Measuring Hydraulic Conductivity for Bioretention Soil Mixes 7A-10

Chapter 8 – Runoff Treatment BMPs

Table of Contents

Chapter 8 – Runoff Treatment BMPs	8-1
8.1 Introduction	8-1
8.1.1 Purpose of this Chapter.....	8-1
8.1.2 Content and Organization of this Chapter	8-1
8.1.3 How To Use this Chapter	8-1
8.1.4 Runoff Treatment Facilities.....	8-2
8.2 Treatment Facility Selection Process	8-4
8.2.1 Step-by-Step Selection Process for Treatment Facilities.....	8-5
8.2.2 Other Treatment Facility Selection Factors	8-13
8.3 Treatment Facility Menus	8-15
8.3.1 Guide to Applying Menus	8-15
8.3.2 Oil Control Menu.....	8-16
8.3.3 Phosphorus Treatment Menu.....	8-17
8.3.4 Enhanced Treatment Menu.....	8-18
8.3.5 Additional Water Quality Mitigation Requirements	8-20
8.3.6 Basic Treatment Menu.....	8-23
8.4 General Requirements for Stormwater Treatment Facilities.....	8-24
8.4.1 Design Volume and Flow	8-24
8.4.2 Sequence of Facilities	8-27
8.4.3 Facility Liners	8-28
8.5 Pretreatment.....	8-32
8.5.1 Purpose	8-32
8.5.2 Applications.....	8-32
8.5.3 Best Management Practices for Pretreatment.....	8-32
8.6 Infiltration and Bioretention Treatment Facilities.....	8-34
8.6.1 Purpose	8-34
8.6.2 Applications and Limitations.....	8-34
8.6.3 Soil Requirements for Infiltration for Water Quality Treatment.....	8-35
8.6.4 Best Management Practices for Infiltration and Bioretention Treatment.....	8-36
8.7 Filtration Treatment Facilities	8-41
8.7.1 Purpose	8-41
8.7.2 Description.....	8-41
8.7.3 Performance Objectives.....	8-51
8.7.4 Applications and Limitations.....	8-52

8.7.5	Site Suitability	8-52
8.7.6	Design Requirements	8-53
8.7.7	Construction Criteria	8-55
8.7.8	Best Management Practices for Sand Filtration	8-55
8.8	Biofiltration Treatment Facilities	8-74
8.8.1	Purpose	8-74
8.8.2	Applications	8-74
8.8.3	Site Suitability	8-74
8.8.4	Best Management Practices	8-75
8.9	Wet Pool Facilities	8-99
8.9.1	Purpose	8-100
8.9.2	Applications	8-100
8.9.3	Best Management Practices for Wet Pool Facilities.....	8-100
8.10	Oil and Water Separators	8-129
8.10.1	Purpose	8-129
8.10.2	Description.....	8-130
8.10.3	Performance Objectives.....	8-130
8.10.4	Site Suitability	8-130
8.10.5	Design Criteria – General Considerations	8-130
8.10.6	Oil and Water Separator BMPs	8-134
8.11	Emerging Technologies.....	8-137
8.11.1	Background.....	8-137
8.11.2	Evaluation of Emerging Technologies	8-138
8.11.3	Applicability and Restrictions	8-138
 Chapter 8 References		 8-141
 Appendix 8A – Geotextile Specifications.....		 8A-1
 Appendix 8B – Wellhead Protection and Critical Aquifer Recharge Area Maps.....		 8B-1

Chapter 9 – Source Control

Table of Contents

Chapter 9 – Source Control	9-1
9.1 Introduction	9-1
9.1.1 What is the Purpose of this Chapter?.....	9-1
9.1.2 Ecology’s <i>Stormwater Management Manual for Western Washington Standards</i> , Adopted	9-1
9.1.3 How Does this Chapter Apply to Businesses and Properties?	9-3
9.2 Source Control BMP Selection	9-4
9.3 General Principles of Pollution Prevention	9-4
Appendix 9A – Stormwater Pollution Source Control Checklist and Worksheet	9A-1
